

CONCAVE CUPS WITH VULCANISED SUPPORT

These cups have been designed for handling cylindrical objects, such as pipes, bottles, round profiles, etc. Its aluminium support is vulcanised onto the cup and it is provided with a central threaded hole to ease its fastening to the machine and with a side hole for the possible insertion of a guiding, anti-rotation pin.

These cups can be provided in the three standard compounds: oil-resistant rubber A, natural para rubber N and silicon S.
